

## Android Problem:

Design an Android App to display **All Closed Pull Requests** from Github public repository of your own code.

UI should include : Title, Created date, closed date, userName, user Image

Refer:

API: <https://developer.github.com/v3/>

### Things to keep in mind:

- 1.No need to persist data on app relaunch
- 2.Write clean, concise and 100% original code
- 3.You can use a networking library like Volley, Retrofit, etc.
- 4.Besides the above, please do not use any other third-party library (you can use some lib for image)

### Judgement Criteria:

- 1.Quality and maintainability of code
- 2.Design of the user-interface and user-interaction
